In this application timber is monitored and managed as inventory. The computer-implemented business management recited in claims 1-39 appear the proper subject matter of class 705 since the information is used to assist in managing a timber operation. Note, for example, that claim 4 recited that one of the constraints is the number of customer orders for the product. Class 705/22,28 appears proper. Also note comments of refusing examiner.

Thanks,

Dave
